

This National Science Foundation funded project is designed to bring high quality STEM and literacy resources to community settings like libraries, museums, and out-of-school time programs to engage underserved families in accessible and familiar settings.

OregonASK, in partnership with the State Library of Oregon and Oregon Center for Career Development, is pleased to offer **FREE** training on Leap into Science Balance-themed Workshops. Leap into Science is a nationwide program that integrates open-ended science activities with children's books, designed for **children ages 3-10 and their families**. Each year, a new kit is available with new topics and materials for new or continuing programs. All educators welcome who are interested in supporting STEM early learning & school age opportunities

All training participants have access to high-quality science & literacy curriculum and online resources.

**December 1st, 2018**  
**Roseburg Training**

in partnership with Umpqua Valley STEAM Hub

Programs who chose to participate in the national pilot will be expected to provide a total of three workshops, two for kids and one for families. As part of the pilot, training attendees will also receive:

- Ongoing support and participation in Leap into Science National Network
- A kit of materials valued at \$300
